

POLITICS FOR QUALITY, SAFETY AND ENVIRONMENT

MFB BONOMI SRL has implemented, maintained and certified since a long time an Integrated Quality and Environmental Management Safety System compliant with ISO 9001, ISO 14001 and 45001 standards to achieve and maintain the satisfaction of all interested parties over the time.

In order to ensure the continuity of the company's business, General Management is committed to defining the strategic guidelines, Vision and Mission and the objectives of the QMS.

STRATEGIC DIRECTIONS

- To offer the market specialized solutions for the hot forging and mechanical processing of water meter bodies and accessories for the distribution of drinking water.
- To be a reliable partner for customers specialized in drinking water measurement systems
- To develop a solid distribution presence on the world market
- To guarantee environmental sustainability through a product with a high rate of recyclability of the raw material
- Ensure health and safety in the workplace for all employees and external visitors by complying with current legislation, company procedures, and through the organization's commitment to safety issues.

VISION & MISSION

The quality of the product and of the service towards our customers are essential conditions for the growth of our business. The high quality reliability and environmental compliance of our products and services are strengths that we cannot give up while maintaining sustainable cost standards towards the customer. Flexibility and fast response times are a focal point, always guaranteeing high quality standards and paying the utmost attention to the protection of workers.

With this written commitment, we want to clearly define for all our employees which are the Principles for Quality, Safety and the Environment to be followed for the continuous and better success of the company.

WE WORK TOGETHER FOR OUR CLIENT

Attention to the customer passes through a service able to guarantee maximum flexibility of delivery together with high quality with competitive costs.

We want to establish long-term relationships with our customers, starting from support activities for the design of new products.

It is essential for us to establish a relationship of cooperation and mutual trust with the customer, which is mutually useful for competitiveness and continuous improvement.

To this end, for MFB BONOMI srl it is of fundamental importance to improve the effectiveness and efficiency of its operational processes, through the constant reduction of the number of non-conformities.

CIRCULAR ECONOMY OF PRODUCTS

The success of our company depends on the sustainable development of products and processes in order to maximize the benefits derived from the circular economy.

The reduction of CO2 emissions is a direct / indirect goal closely linked to the energy efficiency of the machines and the ability to reuse chips coming from the mechanical machining. For this reason as well, it is the organization's intention to make more rational use of energy resources and raw materials, monitoring and seeking to improve its performance in relation to environmental issues

POLITICS FOR QUALITY, SAFETY AND ENVIRONMENT

MAXIMUM ATTENTION TO WORKERS' HEALTH AND SAFETY

For the General Management, it is essential that all workers are informed, trained, and instructed to carry out their duties safely, that their involvement and consultation are guaranteed, including through their representatives, that equipment and workplaces comply with current regulations, and that a continuous commitment to preventing accidents and occupational diseases is promoted. With the aim of pursuing these objectives, MFB BONOMI srl promotes cooperation among the various company resources and with the relevant external entities.

AIMS

The Management defines the following aims of QMS for the implementation of the commitments made:

- excellence in the mechanical machining and hot forging of products made of non-ferrous materials
- understanding of customer needs to pursue customer satisfaction and satisfaction of all parties involved in company work activities
- provision of safe, healthy working environments where everyone is aware of its role
- attention to the implementation of sector regulations on respect for the environment and cogency for a sustainable business
- adopt technologies and processes that offer the best environmental performance, where reasonably feasible in technical and economic terms
- involvement of suppliers in the definition of processes
- continuous improvement of processes through the constant analysis of the data collected
